

24. - 26. Apr. 2024

IFAT Brasil

Ausstellung – São Paulo (SP), Brasilien

Bearbeitet von am 5. Dez. 2023

"Brasil's Leading Trade Fair for Water, Sewage, Drainage and Waste Recovery Solutions "

IFAT's international network, with events in Europe, Asia and Africa, is expanding to Latin America: IFAT Brasil will be held in São Paulo from April 24 to 26, 2024, in parallel with the renowned M&T Expo, the largest fair in construction and mining machinery and equipment industry in Latin America. IFAT Brasil's main objective is to boost the emerging market for environmental technologies in Brazil and throughout the region.

In the next decade, the sanitation sector in Brazil will experience rapid development due to the government's privatization strategy and incentive projects. Private investments will drive massive growth in the market for environmental technologies, such as water capture, treatment and distribution, as well as sewage and solid waste collection and treatment. In this dynamic environment, IFAT Brasil will be the central platform to connect all market participants and promote the use of environmental technologies in Brazil and throughout the region. The fair and the market will benefit from IFAT's international network of connections, with its events in Europe, Asia and Africa, and will be fundamental to achieving the Brazilian government's goals for drainage, waste management, water and wastewater management by 2033.
