K-AllShelter Capotex Covers

Edited by on 20. Jul. 2023

K-AllShelter® Capotex Conveyor Belt Covers provides robust and durable protection from extreme environmental elements and helps to control moisture levels of conveyed materials. They offer an effective, safe and economical solution to personal hazard prevention from moving parts and conveyed material.

These covers can also provide a barrier, aiding airborne dust reduction as well as personnel and environment protection.

Capotex Conveyor Belt Covers are manufactured using a wide range of optional materials and engineered to shed water giving you years of rust-free service and can be custom made to suit all belt widths and models.

Key Benefits

- **Safety:** Covering conveyor belts reduces the risk of work-related accidents by reducing traffic and access.
- **Sustainability:** Highly effective passive airborne dust emission reduction solution, with no resource or energy consumption.
- **Environmental protection**
- **Longer lasting components:** Covered belt conveyors results in less wear on conveyor components as well as acting as a safeguard against UV damage to the belt.
