Vortex Wye Line Pneumatic Diverter Valve

Edited by on 4. Oct. 2023

Vortex diverter valve for vacuum or dilute phase pneumatic conveying systems. Able to handle pressures up to 15psig or 1 barg depending on size.

Vortex products are engineered for dependability, durability, easy maintenance, and offer proven solutions to material handling and process efficiency problems. Our employees take pride everyday in their work through our four common core values: respect, integrity, humility, and passion to make the best possible dry bulk handling equipment for your needs.
