WAMGROUP : SSC - Shaftless Screw Conveyors

Edited by on 15. Dec. 2023

SSC Shaftless Spiral (Screw) Conveyors offer large volume capacity and the possibility of handling particularly difficult materials. The video shows the operating principle of shaftless screw conveyors and examples of application.

SSC Shaftless Spiral (Screw) Conveyors are designed for handling of urban solid waste, screenings and floating matter, de-watered, thickened, or conditioned sludge, packaged food, creams or pastes, as well as waste from meat, fish, fruit and vegetable processing. The main sectors of application are: waste water treatment, sugarhouse rejects, fish industry, solid waste treatment, fruit and vegetable processing plants, beverage industry, pulp and paper, chemical industry, food industry in general, meat processing plants, abattoirs/slaughterhouses, restaurants, canteens, and catering in general.
