Admix adds automated Powder Induction and Dispersion System to its Equipment Lineup

Edited by on 27. Apr. 2023

Londonderry (NH), United States –

Admix, Inc., global manufacturer of hygienic and industrial mixing equipment serving the food/beverage, chemical, cosmetic, and pharmaceutical industries, today announces the introduction of its Fastfeed PLC, an automated powder induction and dispersion system. The newest addition to the Fastfeed product lineup – the Fastfeed PLC model FF-425-PLC – features full automation controls and a touchscreen operation designed to increase efficiency and productivity even further.

The Fastfeed PLC offers unique mechanical advantages including rapid incorporation and wetting out of powder ingredients, coupled with a host of automation advantages such as ergonomic touchscreen operation, recipe storage, monitoring job stats, remote capability for maintenance or updates, and one-touch CIP mode.

“We are excited to offer the automated Fastfeed PLC to processors who are looking to boost their efficiency and operator ergonomics,” said Patrick Lakin, Director of Sales and Marketing, Admix, Inc. “We look forward to helping our customers improve their powder induction and dispersion processing even further with these new automation features.”

The Fastfeed PLC is available to order effective immediately on a worldwide basis directly through Admix and its sales partner channel.
