HECHT Technologie - SoliValve split-cone system

Bearbeitet von am 15. Dez. 2023

The SoliValve® Split-cone System by HECHT enables fully automatic, low-contamination as well as contained discharging and dosing (up to OEL 10-100 $\mu\text{g}/\text{m}^3$) of slightly hazardous products from special FIBCs with conical closure (SoliBag®).

For this purpose, a passive split-cone valve is fit into the FIBC bottom so that it can be automatically docked to the active part (SoliValve® active valve). The system is therefore particularly suited for chemical, food, and pharmaceutical applications as well as for avoiding cross-contamination. In addition, using Soli-Bags® is an economical alternative to using containers / IBCs. Soli-Bags® can be reused up to 20 times.
