Metso unleashes Innovation at MINExpo, Las Vegas

Bearbeitet von am 23. Aug. 2024

Helsinki, Finnland –

Metso is excited to highlight its industry-leading sustainable technology and pit-to-port aftermarket solutions at MINExpo INTERNATIONAL® 2024, the industry's largest global mining event, in Las Vegas, Nevada, USA from September 24 to 26.

“We have selected Empowering a responsible energy transition as our theme at MINExpo. For Metso, this means taking an integrated approach and driving a more responsible business ecosystem. Our strength in any minerals process and service solution design is based on the deep concentrator and hydrometallurgical knowledge we have gained through working with hundreds of mining customers around the world. The result is optimized, more sustainable processes with less downtime and increased production with better safety - and a better return on investment,” said Giuseppe Campanelli, President, North and Central America at Metso

Visitors are welcome to visit the Metso booth #12543 in MINExpo's West Hall, where they will be met by Metso experts.

In the Metso booth, the company will be featuring:

- Planet Positive portfolio with 100+ sustainable products and services that are demonstrably more energy or water efficient than the market standard
- Battery minerals production and recycling processes technology and equipment, for the entire copper, lithium, and nickel production chain from the mine to battery materials and more
- Comprehensive aftermarket solutions for Metso and non-Metso equipment covering every stage of the minerals process and
- 45+ sophisticated automation and digital solutions such as intelligent instruments, remote monitoring, and digital twins

Visitors are also invited to join the company in the Metso booth for a curated series of 15-minute-long presentations on key industry topics and latest innovations:

- Product launch - Unlocking the extreme in crushing with the XM Series
- Battery minerals - Producing LiOH with sulfate and acid-free alkaline leach process
- Sustainable services - Cutting CO₂: Revolutionary mill liner recycling
- Digitalization - The digital difference in solving the mining labor shortage

The complete list of topics and presentation schedule can be found on the Metso website.
