The Big-Bag Conditioner is designed to loosen highly compressed product, resulting in a smooth and fast product flow. This innovation speeds up the production process as Dinnissen Process Technology combines the conditioning and disposal of Big-Bags in one single solution. The Big-Bag Conditioner has been designed, built and tested in-house and has also been tested with the customer's

products. The validated system takes care of conditioning and discharging in one station and the high discharging speeds ensure an accelerated production process.
