Sustainable Dust Emission Reduction with Conveyor Belt Covers

Edited by on 19. Jul. 2023

Braeside (VIC), Australia –

K-AllShelter® Capotex Conveyor Belt Covers are an effective way to reduce dust emissions from conveyor systems. Dust emissions can be harmful to human health and the environment, and can also lead to costly maintenance problems. Conveyor belt covers can help to reduce dust emissions by providing a physical barrier between the conveyor belt and the surrounding air.

K-AllShelter® Capotex Conveyor Belt Covers are manufactured using a wide range of optional materials and engineered to shed water giving you years of rust-free service and can be custom made to suit all belt widths and models.

Improved Eafety: Conveyor belt covers can help to prevent accidents by reducing the risk of workers coming into contact with moving parts or falling materials, belt covers can also protect workers from the health risks associated with exposure to dust.

Increased Efficiency: Belt covers can help to reduce the amount of time and resources that are needed for maintenance.

Improved Environmental Performance: Conveyor covers can help to reduce the environmental impact of dust emissions.
