Stationary Electric Excavators in the Circular Economy - SENNEBOGEN 840 & 855 E Hybrid

Edited by on 2. Aug. 2023

To make its business processes even more environmentally friendly, the PRADIER Group developed a logistics system with the river as its center. With the principle of circular economy, according to which the company keeps various resources and goods circulating via shipping between the two sites along the Rhône, the two electrically driven handling dredgers from SENNEBOGEN operate at the hub, ensuring efficient and energy-saving material handling.
