Sympatec at Solids Dortmund 2023

Edited by on 4. Jan. 2023

Clausthal-Zellerfeld, Germany -

SOLIDS Dortmund is the leading trade show for powder and bulk solids technologies in Germany. At SOLIDS Dortmund, exhibitors will present **the entire value chain of mechanical processing technology** for fine- to coarse-grained materials in 4 halls. Visitors can find out how to process, handle, store, transport and analyse their granulates, powders and bulk materials most efficiently in personal dialogues with the experts.

The particle size and particle size distribution are important determining factors in the design and operation of many process operations involving dry particles and powders. Experience the reliable powder characterisation of your raw materials during our live demonstrations.
