Peterson retires from Vortex Global after 25 Years of Service

Edited by on 26. Jan. 2021

Salina (KS), United States –

Kevin's involvement in the dry bulk industry includes membership in the International Association of Operative Millers, International Milling Education Foundation, the Society for Mining, Metallurgy & Exploration, and the Industrial Minerals Association of North America.

He was elected an Emeritus Member of the International Association of Operative Millers, was a past Advisory Board Member of the Powder & Bulk Solids Expo, and

served on the Board of Directors of the Industrial Minerals Association of North America. Kevin received the Outstanding Service Award from Kansas State University's Department of Grain Science and Industry. He was a contributor to the Dust Control Handbook for Industrial Minerals Mining and Processing published by the National Institute for Occupational Safety and Health (NIOSH).

While at Vortex, Kevin traveled throughout North America to meet with companies involved in the processing, handling, and transportation of dry bulk material. He authored hundreds of case studies and numerous articles for industry specific publications that shared Vortex's products and corporate capabilities with personnel involved in dry bulk material handling.
