Superior Industries expands Range of Modular Overland Conveyor Offering

Edited by on 16. Dec. 2020
Morris (MN), United States –

Superior Industries, Inc., a U.S.-based manufacturer and global supplier of bulk material processing and handling systems, is launching a new model of its popular Zipline® Overland Conveyors. The new EXT Series expands the range of the modular conveyor product line for longer and wider material handling applications.

Zipline Conveyors target bulk producers looking for overland conveyors that require little or no pre-engineering for express deliveries and are designed for quick assembly in the field. Today, with the addition of the new EXT Series, Zipline Conveyors are available in lengths up to 2500 feet (762 m) and belt widths up to 48-inches (1220 mm).

Between the head and tail are a series of 40-foot (12.2 m) intermediate sections designed with 8-inch (200 mm) channel and 2-foot (610 mm) tall support stands. Standard Zipline Conveyor models are equipped with mechanical take-ups for shorter distances, but the new EXT Series includes a gravity take-up tower to accommodate longer distance overland conveying.

All of the conveyor components -- like the pulleys, idlers and scrapers -- are also manufactured in-house. This unique advantage means higher quality, faster deliveries and all-inclusive support from Superior Industries.
