Tenova TAKRAF: Stackers and Reclaimers for Power Plant Stockyard in Bangladesh

Edited by on 22. Jan. 2020

Leipzig, Germany –

Tenova TAKRAF has announced an important project award for the supply of four stackers and four portal reclaimers for a large material handling stockyard for a power plant project Bangladesh. The new power plant will represent a key installation for the development of the country.

The contract awarded to TAKRAF includes the supply of four stackers, each with a capacity of 3000 t/h, and four large portal reclaimers, each with a capacity of 1450 t/h. Tenova TAKRAF's office in Italy will assume overall responsibility for the successful conclusion of the contract and will provide overall technical coordination whilst leveraging competencies from the various TAKRAF global competence centers. Silvio Leoni, TAKRAF Italy Managing Director, had this to say upon signing of the contract: "Successful award of this project only serves to entrench Tenova TAKRAF as a leading global materials handling specialist. I am proud of the engagement and interaction of our global offices and the willingness of colleagues to find an effective solution to our client's specific requirements. We look forward to our equipment being commissioned and delivering above and beyond expectations."
