AUMUND supplies major Clinker Conveying Machinery Packages for Argentinian Cement Plants

Edited by on 18. Dec. 2018

Rheinberg, Germany -

The order package will include 19 silo discharge gates which will be installed under the clinker silo. (Photo: AUMUND)

The order package will be rounded off with 19 silo discharge gates which will be installed under the clinker silo to feed the pan conveyors located there. Loma Negra, established in 1926, awarded AUMUND the order in August 2017 to build a second kiln line with a capacity of 5,800 tpd at the L'Amali Plant in Olavarria in Buenos Aires Province. The new line, which will produce 2.7 million tonnes of clinker per year, will be located adjacent to the existing kiln line. Production will

start early in 2020. In June 2018, AUMUND Beijing was able to conclude another successful project in Argentina, together with AUMUND Brazil and Sinoma, to supply four belt bucket elevators, three chain bucket elevators and three pan conveyors via Sinoma TDI to Cementos Avellaneda. Cementos Avellaneda belongs to the Brazilian Votorantim Group and Spanish Molins. Traditionally AUMUND Brazil has had good working relationships in the oligopoly of cement production in Argentina, where the market is shared between four producers, Loma Negra, Holcim Argentina, Cementos Avellaneda and Petroquímica Comodoro Rivadavia, with 18 manufacturing locations between them.
