Freeman Technology to host free one-day Powder Flow Seminar in Birmingham, UK

Edited by on 12. Jun. 2018

Kiln Pit Hill, United Kingdom -

The workshop will include presentations by Jamie Clayton, Operations Director at Freeman Technology, who will provide an introduction to understanding powder flow and powder behaviour; David Smith, Owner at [DJS Process Consulting](#), who will provide an industrial perspective, evaluating examples of common processing problems; and Cathryn Langley, Laser Diffraction Product Manager at Malvern Panalytical, who will look at the effects of particle size and shape. Delegates will also have an opportunity to see demonstrations of Freeman Technology's FT4 Powder Rheometer[®] and the latest instrumentation from Malvern Panalytical.
