## Jansen&Heuning: New Bigbag Crusher performs well

Edited by on 7. Feb. 2018

With a pressure of 20 tonnes, the crusher breaks the

content into small chunks. Two hydraulically controlled articulated arms - with 200 bar oil pressure - press the bigbag in eight steps. The program can easily be set with a touch screen. The customer located in Brabant crushes ten bigbags per hour and is very content with the Jansen&Heuning machine.
