Rulmeca Starts Drum Motor Shell Production in Wilmington (NC), USA

Edited by on 7. Dec. 2017

Almè (BG), Italy –

All tooling for the lathe was manufactured by Rulmeca Germany to insure that Wilmington shell production techniques and quality are consistent with those of the company's primary production center. A live turret installed on the lathe enables Rulmeca to offer not only stainless steel shells with trapezoidal and center crowns, but also with welded keys to drive sprockets.
