HECHT Technologie: Liner Connection System LAS-EC ("Easy Connect")

Edited by on 27. Oct. 2017

Pfaffenhofen, Germany –

Brand New patented Big Bag Connection System The Big Bag Connection System LAS-EC ("EASY Connect") by the technological leader HECHT Technologie GmbH provides the solution for high containment applications by offering defined and safe handling with a logical operating sequence of only a few steps. Tailor-made to meet your discharging requirements, it enables easy, ergonomic and especially safe discharging of powder.

The innovative [LAS-EC](#) features high operational safety, easy discharging without consumables such as O-ring gaskets. The operating is uncomplicated due to its pneumatic control unit with **only three functions for connecting, sealing and disconnecting**: In addition to the GMP-compliant design and an FDA approval, the unit also conforms to the ATEX guideline. **Features**• Patented System•

Control unit with 3 buttons:- Connecting, Sealing and Disconnecting• No consumables• Fast change of Big Bags or liners• Pneumatic and mechanical sealing• Containment up to OEB 4• Optional WIP and CIP Equipment• Ergonomic Handling**Handling**1. Positioning and connecting of the Big Bag2. Fixing of the inner liner with the pneumatic sealing device3. Inserting and tighten of the guide rope4. One time pushing of the plate5. Removing of the rope6. Fixing and mechanical sealing7. Discharging of the Big Bag8. Closing of the Big Bag with the

Containment Closing System
