- Logistics Engineering
- Project Management
- Renovation, Rehabilitation & Repair

Scherr+Klimke AG

is a multi-disciplinary firm recognized for design excellence, innovation, and its dedication to delivering services that meet or exceed our clients' quality, schedule and cost objectives. In continuous practice since its founding in 1956, we offer a wide range of services including architectural design, building engineering and construction documents, logistics consulting and project management services.

Philosophy

Our philosophy is simple:

- Respect and follow up of clients opinion and requests
- Deliver exceptional work
- Never miss a schedule
- Be innovative
- Always meet the budget
- Exceed expectations

With all the key disciplines under one roof – architecture and engineering – we can stay on top of the sometimes daily changes a project requires. And, unlike smaller firms, we're able to avoid the time and expense of subcontracting some of our work, bringing higher-quality results – at truly significant cost savings.

Staff

Our team of approximately 120 persons includes Registered architects, engineers, design and engineering technicians, project managers and support persons.

Experience

Our experience includes especially projects in the following industries

- Automotive
- Cement
- Pharmaceuticals & Health Care
- Retail, Logistics & Transportation

This diverse spectrum of project types is mentioned to assure our clients of the ability to not only provide them with a pleasingly designed, functional facility, but also with a finely tuned integration of existing and new electrical, mechanical, and communication systems.
